Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15,16 are rejected under 35 U.S.C. 102(b) as being anticipated by Ferguson et al.

Ferguson et al. teaches a balloon catheter and method of use, involving inserting a stiffening stylet (23) into a first lumen (14), placing the cannula into the vessel, removing the stylet, inflating the balloon (16), and then delivering fluid in the vessel through a lumen (15) spaced from the stylet lumen. (column 8, lines 51-65).

Allowable Subject Matter

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance: None of the prior art of record discloses a catheter with fluidly isolated infusion and stylet lumens wherein the distal tip of the stylet lumen is blocked and the infusion lumen is connected to a sealing member that expands to contact the vessel walls.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US Patent 4,919,651 teaches a catheter with a stylet lumen and infusion lumen wherein the distal end of the catheter is blocked.
